

From inside to the great outdoors, *Transitions* lenses sense how light changes—**seamlessly adapting to the perfect tint** from the moment you walk outside. When you return indoors, they **seamlessly fade back to clear**.

Every day, in every light condition, *Transitions* lenses let you **see more comfortably** and help reduce glare, eyestrain, and eye fatigue.

Plus, all *Transitions* lenses **block 100% of UV rays** and **help protect against harmful blue light** from digital devices, screens and especially bright sun.

When you enjoy light more comfortably, you enjoy life more richly.

Look inside to discover the right *Transitions* lens for you.
